

# Outdoor Bark Control

## How it Works

When the Outdoor Bark Control is within range of constant barking, an internal microphone picks up the sound and the unit is activated. The PetSafe® Outdoor Bark Control emits an ultrasonic sound. The ultrasonic sound can only be heard by the dog. Startled by the high-pitched sound, the dog should stop barking, as it will associate its bark with this unpleasant noise. The PetSafe Outdoor Bark Control has 4 settings including 3 Sensitivity Levels and a Test Mode and is effective up to 15 metres.

## Features

- Deter your own dog or your neighbour's dog from barking
- Designed to hang/mount on a tree, wall or fence post
- Safe and effective for all sizes and breeds of dogs
- Uses ultrasonic sound to deter nuisance barking
- Detects the sound of barking up to 15 metres away
